Skills

✓✓✓ `Typescript` `Javascript` `HTML` `CSS` `React` `Next.js / Next.js V13` `React Query` `Redux` `Node.js` `Deno`

✓✓ `Bash` `Lua` `Redux Toolkit` `MongoDB` `Prisma` `Git` `OAuth`

✓ `Java` `Python` `OCaml` `Ruby on Rails`

Experience

### Software Engineer (Wealthfront)   July 2021 – present

- Worked on a cross-functional team of engineers, designers, and project managers to launch several flagship investment products
- Standardized data fetching patterns in the web codebase with React Query and number of custom utilities and wrappers; led the migration to adopt these new tools
- Conducted technical interviews for prospective web engineers, working through coding and conceptual questions with candidates
- Participated in the web on-call rotation, triaging a variety of production bugs along with more serious cross-functional issues

Software Engineer Intern (Wealthfront)   Summer 2020

- Collaborated with designers to renew an older landing page with a sophisticated, page-long scrolling animation with several different stages

Personal projects

⭐ elanmed.dev 🔗

- Personal tech blog with 15+ articles on: programming with React, Next.js, and Typescipt, customizing NeoVim into a fully-fledge IDE, setting up continuous integration, and more
- Includes OAuth with Github (manually implemented), server-side data fetching with client-side optimistic updates, shareable URLs with automatic scrolling, and more
- Built with Next.js, Typescript, Tailwindcss, Prisma, React Query, Framer Motion, and Playwright

⭐ guacarina 🔗

- Ocarina educational site with a focus on practicing ocarina scales. Includes a built-in metronome, shareable URLs to resume page-state, and more
- Built with Next.js v13, Typescript, Tailwindcss, and Reach UI

Education

Johns Hopkins University   2017 – 2021

Bachelor's degree in Computer Science (3.83)
