Skills

☑☑☑ `Typescript` `Javascript` `HTML` `CSS` `React` `Next.js` `React Query` `git`

☑☑ `Bash` `Redux/Redux toolkit` `MongoDB` `Node.js` `OAuth`

☑ `Ruby` `Lua` `Ruby on Rails` `Prisma`
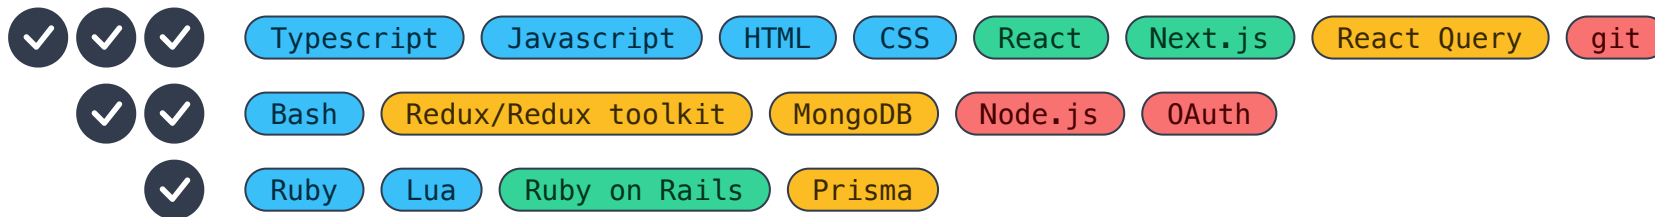

Experience

Software Engineer (Wealthfront)   July 2021 — present

- Worked on a cross-functional team of engineers, designers, and project managers to launch products such as: managed investment account portfolio customization, self-directed stock investment accounts, and managed bond investment accounts
- Standardized data fetching patterns in the web codebase with React Query and number of custom utilities; led the migration to adopt these new tools
- Conducted technical interviews for prospective web engineers, working through coding and conceptual questions with interviewees
- Participated in the web on-call rotation, working to triage a variety of production bugs along with more serious cross-functional issues

Software Engineer Intern (Wealthfront)   Summer 2020

- Collaborated with designers to renew an older landing page with a sophisticated page-long scrolling animation with several different stages
- Worked on a cross-functional team of engineers, designers, and project managers to launch products such as: highlighting the benefits of tax-loss harvesting (Wealthfront's automated service to defer taxes) on the investment account dashboard, along with several sweepstakes events for new users

Education

Johns Hopkins University   2017 — 2021

Bachelor's degree in Computer Science (3.83)
