Skills

● Typescript Javascript HTML CSS React Next.js React Query git

◐ Bash Redux/Redux toolkit MongoDB Node.js OAuth

○ Ruby Lua Ruby on Rails Prisma

Experience

Software Engineer   July 2021 – present

- Worked on a cross-functional team of engineers, designers, and project managers to launch products such as: investment account portfolio customization, stock investment accounts, and bond investment accounts
- Standardized data fetching patterns in the codebase with React Query and number of utility wrappers; led the migration to adopt these new tools
- Conducted technical interviews for prospective web engineers, working through coding and conceptual questions with interviewees
- Participated in the web oncall rotation, working to triage a variety of production bugs along with more serious cross-functional issues

Software Engineer Intern   Summer 2020

- Colloborated with designers to renew an older landing page with a sophisticated page-long scrolling animation with several different stages
- Worked on a cross-functional team of engineers, designers, and project managers to launch products such as: highlighting the benefits of tax-loss harvesting on the investment account dashboard, and several sweepstakes events for new users

Education

Johns Hopkins University   2017 – 2021

Bachelor's degree in Computer Science (3.83)
